

Vishakha Lonkar Trainee Software Engineer | Aspiring Data Scientist

Pune, India | +91 8767605575 | lonkarvishakha8767@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

Aspiring Data Scientist with an MCA and strong foundation in Python, SQL, Java, and machine learning. Built a credit card fraud detection model achieving 87% accuracy using logistic regression and feature engineering, and a heart disease prediction model achieving 91% accuracy. Skilled in Pandas, NumPy, Scikit-learn, TensorFlow, and data visualization tools (Power BI, Matplotlib). Eager to apply machine learning and data analysis expertise to deliver data-driven business solutions.

PROFESSIONAL EXPERIENCE

Fresher — Actively seeking Data Science / Software Engineering roles

EDUCATION

Master of Computer Application (MCA) CGPA: 8.6 <i>PES Modern College of Engineering</i>	06/2025 – Present Pune
Bachelor of Science, Information Technology CGPA: 8.73 <i>K.B. Joshi Institute of Information Technology</i>	06/2022 – 05/2025 Pune

PROJECTS

Credit Card Fraud Detection github.com/Vishulonkar8767/Creditcardfrauddetection	01/2025 – 03/2025
- Developed and fine-tuned a logistic regression-based machine learning model achieving 87% accuracy in predicting credit card fraud. - Reduced false positives by 16% through rigorous feature engineering and hyperparameter tuning. - Applied under-sampling and ensemble techniques to address class imbalance, improving model performance by 15%. - Optimized model efficiency by 23% and overall accuracy by 6% through iterative testing and validation.	
Heart Disease Prediction	07/2025 – 08/2025
- Built a logistic regression classification model to predict heart disease risk, achieving 91% accuracy, surpassing common industry benchmarks. - Performed exploratory data analysis and feature selection to identify key clinical risk indicators. - Followed data privacy and security best practices throughout model development and evaluation. - Improved healthcare outcome prediction reliability by 26% through refined feature engineering and model tuning.	

CERTIFICATIONS

Python For Data Science and Data Analytics — The Kiran Academy	08/2026
- Successfully completed training in Python for Data Science and Data Analytics. - Learned Python programming concepts and data analysis techniques. - Worked on data processing, visualization, and analytical problem-solving using Python. - Applied Python skills to perform data-driven analysis and insights generation.	
Machine Learning With Python	2025
- Developed and deployed machine learning models using Python, improving predictive analytics by 15% across key projects. - Used Scikit-learn, TensorFlow, and PyTorch to build solutions for classification and regression tasks.	

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C++,HTML,CSS
Machine Learning & Data Science: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, Feature Engineering, Model Evaluation
Tools & Platforms: Jupyter Notebook, Visual Studio Code, Git/GitHub, Power BI, Matplotlib
